WORK EXPERIENCE

Software Engineer   Aug 2025 – Present

Resilient Coders   Remote

▪ Collaborated with a distributed team to build accessible and responsive web applications, enhancing user satisfaction.

▪ Built RESTful APIs to ensure robust and scalable backend solutions, supporting a 20% increase in user traffic.

▪ Contributed to weekly sprints and daily stand-ups, improving task prioritization and sprint efficiency by 15%.

▪ Delivered full-stack applications under tight deadlines using the MERN stack, consistently meeting client expectations and launching key features on schedule.

Software Engineer   2016 – 2019

Simple Sourcing   Kenitra, Morocco

▪ Developed automation tools in C# that reduced accountants' manual workload by 40%.

▪ Built and maintained a Canadian online tax return services platform, collaborating with Belarus-based developers.

▪ Delivered bilingual (EN/FR) technical support to Canadian clients, reducing incident resolution time.

▪ Designed Power BI dashboards to track employee KPIs, boosting productivity by 20%.

▪ Set up and managed an e-learning platform for 60+ employees, leading onboarding sessions for new hires.

Data Engineering Intern   Feb 2015 – Jun 2015

MEDZ   Rabat, Morocco

▪ Analyzed and identified flaws and inefficiencies in the then-current BI platform.

▪ Redesigned the existing Data Warehouse using Bottom-Up approach and generated OLAP Cubes.

▪ Designed a reporting solution using ASP.NET Web Forms while following Scrum methodology.

EDUCATION

▪ **B.S in Software and Network Engineering** ▪ Moroccan School of Engineering Scienc,   Rabat, Morocco
